SUMMARY

Multitasking and dedicated computer science student at VIT Bhopal with strong skills in UI/UX, Flutter, C++, and full-stack development. Experienced in building responsive web apps using React JS, Redux, and scalable backend systems with Node JS and Express JS. Contributed to projects like *Claustrophobia* (VR headset), a college website, and *ShopEZ* (MERN-based e-commerce platform).

EDUCATION

VIT BHOPAL UNIVERSITY 8.32 CGPA <i>Bachelor of Technology in Computer Science Engineering</i> <i>with specialization in Health Informatics</i>	September 2022 -Exp.2026 Bhopal, Madhya Pradesh
---	--

K.L. International School 85.02% <i>Class XII, PCB</i>	April 2019-March202 Meerut , Uttar Pradesh
--	---

K.L. International School 75.03% <i>Class X</i>	March 2017- April2018 Meerut , Uttar Pradesh
---	---

SKILLS

Language: Python , C++ , SQL
Databases: MySQL ,
Tools and Platforms : Gen AI , , OpenAPI , Git , Github , Unreal , Blender
Libraries : numpy , pandas , tensorflow

PROJECTS

VR Based Therapy: Claustrophobia	Github
---	------------------------

- Developed a VR-based therapeutic game using Unreal Engine and Unity to help individuals with claustrophobia manage anxiety through gradual exposure therapy.
- Designed an intuitive and accessible user experience with Figma, incorporating relaxation techniques and ensuring user comfort.
- Refined the game through user testing and expert collaboration, applying HCI principles to enhance therapeutic effectiveness and engagement.

College Website	Github
------------------------	------------------------

- Developed a College Management Website – Designed and implemented a user-friendly website for college administration, providing seamless navigation and accessibility.
- Integrated Key Features – Implemented essential functionalities like online fee payment, bonafide certificate requests, and attendance tracking to streamline administrative processes.
- Enhanced User Experience & Security – Ensured secure transactions and data privacy while optimizing performance for students, faculty, and staff.

ShopEZ: E- commerce application	Github
--	------------------------

- Developed ShopEZ, a full-stack e-commerce application using the MERN stack (MongoDB, Express.js, React.js, Node.js), offering a scalable and user-friendly shopping experience.
- Implemented core features like secure user authentication, responsive product browsing, real-time inventory tracking, and efficient order management.
- Built powerful admin tools for product management, order updates, and user role handling, streamlining store operations for sellers.

EXTRA CURRICULAR

DESIGN TEAM

- Designed and managed social media content, event templates, and branding for the Health-o-Tech Club.
- Handled the technical operations and digital projects, ensuring seamless execution and engagement.

EVENT MANAGEMENT TEAM

- Led event planning for the North East Club, organizing events to showcase leadership and management skills.
- Managed end-to-end coordination, ensuring seamless execution and high engagement
